Flow cytometry analysis of N-Cadherin on HeLa cells. HeLa cells were harvested with (Left) or without (Right) trypsinization (please note, the epitope is sensitive to trypsin) and stained with either Rabbit IgG isotype control FITC (dashed line) or Rabbit Anti-Human CD325 antibody PE (solid line) at matching concentrations.

Flow cytometry was performed on a BD FACSCalibur flow cytometry system. Please refer to www.sinobiological.com/Flow-Cytometry-FACS-Protocols-a-750.html for technical protocols.
