

CD32b/FCGR2B/Fc gamma RIIB Antibody, Mouse MAb

Sino Biological
Biological Solution Specialist

Catalog Number: 90014-MM12

GENERAL INFORMATION

Immunogen:	Recombinant Cynomolgus CD32b/FCGR2B/Fc gamma RIIB Protein (Catalog#90014-C08H)
Preparation	This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells obtained from a mouse immunized with purified, recombinant Cynomolgus CD32b/FCGR2B/Fc gamma RIIB (Catalog#90014-C08H; AAL92097.1; Met1-Pro217). The IgG fraction of the cell culture supernatant was purified by Protein A affinity chromatography.
Ig Type:	Mouse IgG1
Clone ID:	12
Specificity:	Cynomolgus CD32b/FCGR2B/Fc gamma RIIB
Formulation:	0.2 µm filtered solution in PBS
Storage:	This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C. Preservative-Free. Sodium azide is recommended to avoid contamination (final concentration 0.05%-0.1%). It is toxic to cells and should be disposed of properly. Avoid repeated freeze-thaw cycles.

APPLICATIONS

Applications: FCM

RECOMMENDED CONCENTRATION

Flow Cytometry FCM: 1:25-1:100

Please Note: Optimal concentrations/dilutions should be determined by the end user.

Flow cytometric analysis of Cynomolgus CD32 expression on Cynomolgus monocytes. Cells were stained with purified anti-CD32, then a FITC-conjugated second step antibody. The fluorescence histograms were derived from gated events with the forward and side light-scatter characteristics of viable monocytes.

Flow cytometry was performed on a BD FACSCalibur flow cytometry system. Please refer to www.sinobiological.com/Flow-Cytometry-FACS-Protocols-a-750.html for technical protocols.
